# FACTS & FIGURES

**EUTELSAT**

# About Eutelsat

With a fleet of 36 satellites providing reach of Europe, Africa, the Americas and Asia-Pacific, Eutelsat is one of the world's leading satellite operators. Our satellite resources, experience and quality of service have gained the confidence of a broad and growing portfolio of customers that include broadcasters, pay-TV operators, telecom operators, Internet service providers and government agencies.

## EXPERIENCE

Eutelsat was created in 1977 as an international organisation. We launched our first satellite in 1983 and became a private company in 2001. Today, we represent a workforce of 1,200 men and women from 47 countries who are experts in their fields and located close to our clients across five continents.

## BUILDING THE FUTURE

Eutelsat is committed to expanding the contribution satellites make towards building an inclusive Information Society, to broadening reach into regions with strong potential for growth and to further unleashing the power of innovation. Our investments in space and on the ground serve to constantly improve the performance and flexibility we provide to our growing base of users.
